

Project Summary Page

Our concern for this project is that we want parents to be aware of the importance of their child's or children's safety. We are concerned with the safety and well being of children because of the widely known issue of child trafficking. Children can be trafficked for many different reasons so we plan to explain this topic in detail to fully inform families and guardians of the severe need to protect the precious lives of God's creations from the hands of harm and danger. We are going to inform people of this issue using the National Program "Families First" to hopefully be able to warn more people so they are able to keep their children safe.

Our goal for this project is to inform others on child trafficking awareness. Through our presentation we will convey the importance of parental supervision and precautions by explaining the trauma children go through during an abduction process. Our goal will be reached by using highly accredited sources.

Our plan is to share our video to help people gain knowledge on child trafficking. During the time we spend on this project we will research ways to prevent trafficking and interview people in our community that know more about this subject. With such an intense subject we hope that we are able to portray the importance and severity of this matter.

We plan to act on this matter by becoming advocates for the awareness of child trafficking. Using members in our community we will create a five minute video on the dangers of child trafficking. We will interview them and find out ways to keep children safe.
